EDUCATION

National Institute Of Technology Delhi

Bachelor of Technology - Electronics and Communication; CGPA: 8.11/10

- Minor Degree - Machine Learning

Pallavi Model School

Class 12th : 94.4/100

New Delhi, India

May 2023 – May 2027

May 2025 – May 2027

Hyderabad, India

April 2022 – April 2023

EXPERIENCE

Zscaler — Software Development Engineer (SDE) Intern

Bengaluru, India

Architected AI-driven cloud security solutions

May 2026 – July 2026

- Engineered and fine-tuned Small Language Models (SLMs) to analyze network telemetry, automating root cause analysis for security incidents and reducing manual review times by 40%.
- Implemented secure and scalable backend features aligned with Zero Trust principles, gaining hands-on expertise in cloud-based cybersecurity architectures.
- Collaborated with cross-functional engineering teams to integrate machine learning capabilities into enterprise security infrastructure, optimizing model inference speed by 25%.

National Institute of Technology Delhi — Research Work

Delhi, India

Developed advanced ML models at NIT Delhi

Jan 2025 – April 2025

- Applied machine learning algorithms (SVR, Random Forest, XGBoost) to optimize solar cell efficiency predictions, improving model accuracy by 23.95%.
- Led a research project, resulting in a published paper and demonstrating a 25% improvement in predictive performance for energy output forecasting.

PROJECTS

WanderWise – AI-Powered Travel Companion 🔗 | AI, React Native, JavaScript, Expo, Firebase, APIs

- Developed a cross-platform travel planner app using React Native and Gemini AI to deliver smart itinerary suggestions, real-time tracking, and interactive maps for seamless trip planning.
- Empowers students to plan budget-friendly research trips, explore destinations with AI insights, and manage itineraries efficiently using an intuitive mobile app.

SportSync: College Project 🔗 | Next.js 13, React, Tailwind CSS, Firebase, NextAuth

- Built a dynamic full-stack web app to streamline campus sports event management, enabling seamless coordination between organizers and participants with real-time registration and updates.
- Unified communication and organization for sports events; eliminated scattered messages and manual tracking.

SnapScribe: AI Image Caption Generator 🔗 | Deep Learning, Transformers (Hugging Face), Python, Gradio, PIL

- Built an AI-powered image captioning tool using the BLIP model to generate accurate, context-aware descriptions for automated image annotation.
- Optimized the model specifically for dynamic image captions compared to generalized LLMs, enhancing accessibility, SEO, and content creation workflows.

ACHIEVEMENTS

- Achieved **Specialist(1528)** rating on Codeforces. [Codeforces](#)
- Solved **500+** coding problems on LeetCode and GFG. [LeetCode](#)
- Selected for **Google Student Upskilling Launchpad program 2025**. [Merit Certificate](#)
- **Flipkart GRID 6.0**: Qualified Round 1 out of **1.5 lakh+** teams; tackled optimization-based algorithmic challenges.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, C++, HTML, CSS, SQL

Frameworks: React, NodeJS, Express, Next.js, Flask, Tailwind CSS

Developer Tools: Git, GitHub, Firebase, VS Code, MySQL, Android Studio

Platforms: Linux, Windows, Web

POSITION OF RESPONSIBILITY

• Member of Technical Club - NIT Delhi

Member of Web Development wing of Technical Club.
